"SULPHOLINE LOTION.—An External Means of Curing SKIN DISEASES.

There is scarcely any eruption that will yield to "Sulpholine" in a few days, and commence to fade away, even if it seems past cure. Ordinary pimples, redness, blotches, scurf, roughness, wash as if by magic; whilst old, enduring skin diseases, that have plagued the sufferer for years, however deeply rooted they may be, "Sulpholine" will successfully attack them. It destroys the animalcule which cause these unsightly, irritable, painful affections, and always produces a clear, healthy, natural condition of the skin. "Sulpholine" Lotion is sold by most Chemists. Bottles, 2s. 6d.

LIVER COMPLAINTS.—DR. KING'S DANDELION & QUININE LIVER PILLS (without Mercury).

THE BEST REMEDY FOR BILIOUSNESS, STOMACH DERANGEMENT, FLATULENCE, ACIDITY, HEADACHE, HEARTBURN, and all other symptoms of disordered liver and dyspepsia. Acknowledged by many eminent surgeons to be the safest and mildest pills for every constitution.

In Boxes at 1s. 1d., 2s. 6d., and 4s. 6d. Sold by Chemists and Medicine Vendors throughout the world.

Prepared by Jas. Rorke, London. Specially valuable Pills for residents abroad and travellers.

TARAXACUM & PODOPHYLLIN.

Prepared only by J. PEPPER, London. This Fluid combination, extracted from medicinal roots, is now used instead of blue pill and calomel for the cure of dyspepsia, biliousness, and all symptoms of congestion of the liver, which are generally pain beneath the shoulders, headache, drowsiness, no appetite, furred tongue, disagreeable taste in the morning, giddiness, disturbance of the stomach, and feeling of general depression. It sets the sluggish liver in motion, very slightly acts on the bowels, giving a sense of health and comfort within 24 hours. It is the safest, mildest, Taraxacum and Podophyllin is a fluid made only by J. PEPPER, Bedford Laboratory, London, whose name is on every label. Bottles, 2s. 6d. and 4s. 6d. Sold by all Chemists. A most valuable and essential medicine for India, Australia, the Cape, and Colonies generally.

ORDER OF SERVICE AT THE CATHEDRAL—

EASTER SUNDAY.

Matins:—Proclamation Hymn, 134 (2nd tune); Easter Anthem, (united of Venice), 121; Proper Psalm, 162 & 165; To Doun, Goss in A; Jubilate, Goss in A; Gloria, 161; Anthem: "They have taken away my Lord"; Kyrie, XIII (Mozart); Nicene Creed, Monotone; Hymn, 135.

Evangelist:—Proclamation Hymn, 131; Proper Psalm, 166 & 128; Magnificat, Nunc Dimittis, S. S. Wesley; Hymn, 140; Hymn, 136.

The Revenue Cruiser *Ling Feng*, Captain Farrow, arrived at Amoy on 3rd April from Takao, and went into the Amoy Dock next day.

The Superintendent of the P. & O. Company informs us that the *Guadiana*, with the next English Mail, left Singapore for Hongkong on Friday, the 7th inst. at 9 a.m.

The Agent of the M. M. Company informs us that the S. S. *Djennah*, with the next French Mail, passed Cape St. James at 8 p.m. on Thursday, the 6th inst.

The Agents (Messrs Jardine, Matheson & Co.) inform us that the S. S. *Glenaron* left Singapore for this port this morning (8th).

The American ship containing the news that Senator Conkling had been nominated to the post of Associate Justice to the Supreme Court; but that the Senator had declined the appointment.

The Hongkong School Athletic Sports will be commenced, on Tuesday, at 1 p.m., not 10 a.m., as we intimated. We learn that the Band of the Buffs will be in attendance from 3 to 5 on that day.

We would remind our readers that the Bazaar for the Orphans of the Italian Convent will be held on Monday, at noon. The Band of the Buffs will be in attendance, and the worthy Sisters are desirous of seeing a large attendance of ladies and gentlemen.

The *Amoy Gazette* notes the departure on 1st April of the S. S. *Thales* for Hongkong of Señor Don Thomas Lozano, Spanish Consul General at this port, en route to Europe on a furlough. We hear that Señor Don Antonio Pita y Cazares, Vice-Consul, remains in charge of the Consulate General.

The case of attempted smuggling of forty-seven passengers on board the P. & O. Company's steamer *Decca*, on the 4th inst., was remanded till the 12th inst., on the application of Mr. Stokes, from the firm of Messrs Sharp, Toller, and Johnson, who appeared for the defendants. Each defendant was allowed out on bail in one surety of \$50 each.

YESTERDAY (Good Friday) the public offices, banks, and business houses were closed, and Divine Service was held in nearly all the Churches. At 8 a.m. the French men-of-war in harbour, the *Villars* and *La Victorieuse*, crossed yards and half-masted their flags. The poor had a gay time of it, as alms were liberally distributed throughout the day.

YESTERDAY afternoon, a Chinaman was discovered dead in a small boat, anchored off Green Island, by the Police. He was the only occupant of the boat, and was found in a reclining position, with an opium pipe by his side, as if he had fallen asleep. The deceased appeared to have been but a short time dead, and was removed to the Government Civil Hospital. There was no trace of any violence on the body but it bore a very emaciated and weakly appearance. The boat was well found in provisions, so that it died had occurred by starvation, it must have been voluntary.

We understand that arrangements are on foot to hold Military Athletic Sports during the coming week. They cannot well be postponed later owing to the advancing hot season. It is to be regretted that the various forces are at variance, the Artillery having decided, we hear, to hold sports of their own. We would suggest to the Committees of the sports that they have at least two open events, one of them 100 yards, as several of the runners belonging to the Civilian Club have expressed their desire to compete in such an event. By introducing open events the support and co-operation of the general public may be assured, if such be desired.

An adjourned inquest was resumed on Thursday afternoon at the Magistrate's, before the Coroner, H. E. Woodhouse, Esq., and the following gentlemen as a jury: Messrs W. A. Wohlters, E. Herbst, and A. A. Cordeiro, regarding the death of Ng

Achun, whose body was found on the beach at Yau-ma Ti on Sunday last. The enquiry had been adjourned to allow of evidence being obtained from the Tung Wah Hospital. One of the physicians of that institution said the deceased was admitted as a destitute; the only thing he complained of was the want of opium. Some medicine to cure this desire was given him, and an offer made to pay his passage to Canton, his native place, but he left the institution without receiving the money, and no more was heard of him until his body was found at Yau-ma Ti. The jury returned a verdict of death from an overdose of opium.

Says the *Japan Gazette* of 31st March:—The American ship *Prima Donna* sails for the Philippines this evening, having completed her discharge of 60,000 cases of kerosene and 75 tons pig iron, and received on board 600 tons of ballast, in ten working days, which for a sailing ship is remarkable despatch.

The same paper of the 30th says:—Sir Harry Parkes and his two daughters, says the *Choya Shinbun*, were received by His Majesty the Emperor and Empress yesterday, when a portrait of Her Majesty Queen Victoria was presented to His Majesty by Sir Harry Parkes.

The *Alta California* says:—The British ship *Tribal* came sailed from Singapore, August 12th, for this port, and was spoken 60 miles from Sagami Island on August 24th, and has never been heard from since. She has been posted at Lloyd's among the missing.

Captain Seabury goes down to Panama in the steamer *City of Peking*, an earlier date. Captain Berry, her commander, has had a long duty in superintending repairs on the vessel, and his present trip to Panama will give him a chance for a little fresh air.

It is reported that a considerable quantity of Quakerism is under engagement for shipment by the next China steamer. (*Observer*, Feb. 28.)—A bill is before the Dominion Parliament to give the American Telegraph and Cable Company the right to land cables on the west coast of the Dominion, with a view of making an Asiatic connection there.

Professor Nordenskjöld is planning a new Polar expedition to New Siberia. The arrangements, however, will not be finished before 1894, as the vessel which is being especially constructed for the expedition cannot be got ready in an earlier date. King Oscar has promised to pay a third of the expenses. Mr. Oscar Dickson will contribute another third, while the remainder will be probably defrayed by Mr. Sibirskoff, or otherwise covered by subscriptions. The King, and the two gentlemen named were the liberal providers of the fund which led to the successful *Vega* expedition.

It is said in Philadelphia that a number of capitalists have purchased the Red Star steamship *Vaderland*, with the idea of making an experiment in the transportation of petroleum in bulk. The result of the experiment will be made public in July. The experiment of carrying petroleum in bulk, has been tried before with sailing vessels, but it did not result satisfactorily.

The *London* learns from Dr. Macgowan, who has been engaged for some time in obtaining information in regard to colour-blindness in Japan and India-China, for which purpose he has interrogated numerous Japanese, Chinese, and others likely to be acquainted with that visual defect, that it is unknown or unrecognized in these regions. Later, through the courtesy of Mr. Dowdhouse, Dr. Macgowan obtained the services of his hospital native assistant in subjecting to examination above a thousand applicants for recruits at that institution. The result of that examination, and that which Dr. Macgowan made among the crews of gunboats in the imperial service of China, failed to afford evidence of the existence of Daltonism. The rarity, if not absence, in China of defective colour-vision, and the evidence of its existence among Europeans and Americans, Dr. Macgowan thinks, suggestive of inquiry whether this dyshromatopsia is not an ethnic characteristic. The examination instituted in India among candidates for employment on railways were probably restricted to European, and the cases there discovered may not have been those of natives. Nubians, it has been lately ascertained, are free from the defect. The incidence of the Chinese and Japanese examined by Dr. Macgowan were generally dark hazel, the other black, which are the prevailing colours.—*Shanghai Courier*.

CRICKET.

HONGKONG C. C. v. THE BUFFS.

Yesterday being a holiday advantage was taken of it to play a game between a team from the new regiment and one from the club. The Club proved by a long way too much for their opponents, and as the season is already far gone the defeated will not likely have a chance of retrieving themselves. Several good scores were made for the Club, especially that of St. Croix, who topped the respectable amount of 89, while there was only one representative from the Buffs that reached a double figure. The match was played with the advantage of excellent weather. Appended are the scores:—

THE CLUB.

CORRESPONDENCE.

"PIONEER" AND THE CHINA INLAND MISSION.

To the Editor of the "CHINA MAIL."

Shanghai, April 4.

Sir,—My attention has been called to the notes from "Pioneer" dated from December 11th to December 23rd, and quoted from the *China Mail* in the *North China Herald*.

I regret to see his remarks under date of December 25th, on the refusal of the China Inland Mission in Tai-yuen Fu. To prevent misapprehension allow me to state that they were commenced in famine times, and that while the stress lasted there were about forty boys sheltered in the one refuge, and perhaps that number of girls in the other.

Mr. and Mrs. Landale were not in permanent charge of the former asylum, but were superintending it in the temporary absence of Mr. Pigott, who, like Mr. Landale, is a gentleman of private means. It is a labouring there in connection with the mission of their own charges; and not only so, they are personally liberal contributors towards our work. The ladies recently taken charge of the girls' refuge. A number of the boys rescued at the time of greatest distress, after receiving a measure of education, have been taken off our hands by relatives as their circumstances improved. Some are now able to support themselves, having been taught useful trades; others are now apprentices, no longer living on the premises, but requiring a little help as to clothing &c. Nine boys are still receiving education in the establishment; and on Sundays especially, others of the older boys are urged to come "home" for a few hours, or for the day.

In like manner the number of girls is lessening. Some have returned to friends—some have been married, and of the dozen remaining in the establishment, I believe one or two are now making engagements to be married to Christian natives.

Accounts are monthly forwarded to me from this establishment. Being from home I have not with me the monthly statements for an entire year, but from these I have with me, I gather that the average expense of each child in the house for food, clothing, books, &c. is not more than £4.0.0 to £5.0.0 per annum. I cannot tell how much of the clothing charged is for apprentices boys out of the house, or for special outfits for girls before marriage. I shall be obliged by your giving publicity to these facts.

Yours faithfully,

J. HUDSON TAYLOR.

SANITATION.

To the Editor of the "CHINA MAIL."

8th April.

Sir,—Your correspondent "H. K. Sanitar" seems to be very much in favour of the dry-earth system of dealing with excreta. In small communities, temporary buildings, or military camps, I think there is much in favour of Dr. Moule's system. But there is much to be said against it when we come to consider the sanitary requirements of a city, situated like Hongkong, where only a small portion of sewage can be carried away by natural means, and the rest of the population, and the surrounding of the Colony. The quantity to be dealt with daily has to be taken into consideration; and on reference to text books such as Parkes's Hygiene, Carpenter's, Kirke's, and Macdonald's Physiology, it is stated to average five ounces of solid feculent matter every twenty-four hours for each adult. Before making any calculation as to the quantity to be treated in Hongkong by the dry-earth system, I would quote from the minutes of the Army Sanitary Committee:—

"It is necessary, first to define what is meant by dry-earth conservancy. This comprehends the introduction of special receptacles into latrines, including suitable vessels and some mechanical contrivance, by which a sufficiency of dry earth (garden soil)—not sand, which is of no use, nor clay, nor other tenacious material—is discharged over the excreta each time the latrine is resorted to by each man. It is estimated that the quantity of dry earth of human excreta is about 2 to 3 lbs. for every ounce of the latrine-closet per man; but the larger the surface exposed in the vessel, the greater must be the amount of earth, and, to insure the best attainable result, provision should be made for receiving and dealing with the urine separately. Latrines for women require more earth than those for men."

The population of Hongkong was 160,000 at last census, but making a liberal allowance for the boat population, the sanitary officer would have to provide for 130,000 individuals; and that amount of excreta treated with the smallest quantity of dry earth would require 260,000 lbs. of earth. Commissioners would place the matter to be removed at over 118 tons every 24 hours; while from my experience of the dry-earth system the earth that can be obtained here neither decolors nor disinfects.

Another point would require to be taken into consideration in dealing with Hongkong—the bulk of our population. They almost be considered vegetarians from the large quantities of rice eaten at meal, and it is found the solid excreta of vegetarians is larger in quantity than when the diet is of an animal kind. It seems to me, from the absence in our mountains and island colony of proper facilities for the disposal of our sewage on the land, that the best mode of disposing of it is carrying it out of our city in pipes, carefully laid and flushed frequently with a plentiful supply of water, which has long been urgently required for.

HONGKONG.

Police Intelligence.

(Before H. G. Thomsett, Esq.)

Saturday, April 8.

DRUNK AND INCAPABLE. Joseph Maxwell, compositor, was found lying drunk in Queen's Road yesterday forenoon by Constable Grieve. Five previous convictions for the same offence were proved against him. Sentence of three months imprisonment with hard labour was imposed.

WALKING INTO THE HARBOUR. John Walker, seaman on board the *Canopus*, while drunk yesterday, was prevented by a Chinese constable from walking into the water down the slip at the Harbour Master's Office. Defendant admitted being drunk, but gave no explanation of his extraordinary conduct in trying to enter the water. He was ordered to pay \$1, in default of payment to suffer two days imprisonment, and if the fine was not paid, ordered to be sent on board his ship at the expiration of two days imprisonment.

A FREQUENT OFFENDER. Chun Fok, an unemployed boatman, was charged by Sergeant Butler with the unlawful possession of one blanket, one pair of trousers, and one jacket on the 7th inst. Sergeant Butler saw the defendant in Hollywood Road with a bundle under his arm, and asked him what the bundle contained. The defendant said it was some of his own clothing, and that he came from a

Chinese steamer. The Sergeant requested him to show the clothing, when he threw the bundle away and ran off. He was apprehended, however, and on the way to the station threw a bad dollar into a house that was undergoing repairs.

William Robert Topping, Gunner in the Royal Artillery, recognised the trousers and jacket as his property, and Arthur Morley, another Gunner, recognised the blanket as being that used by him. The articles were stolen from the *Barmacia*. The defendant admitted the charge, and there being six previous convictions against him, he was committed for trial at the Criminal Sessions of the Supreme Court.

LARCENY OF A SILVER WATCH. Chan Choi was convicted of having stolen a watch from the house No. 28 Cochrane Street on the 4th inst. The watch was the property of Ajah, a teacher, and was worth \$25. The defendant had taken the watch from a watchmaker's shop, No. 137 Queen's Road, and it was there observed by the complainant, who had gone in search of it. The watchmaker was able to identify the defendant as the man who had taken it to the shop. Sentence of six months imprisonment with hard labour was imposed.

GAMBLERS. Wong Hui and seven others were convicted of public gambling in Wai Yun Lane on the 6th inst. on the evidence of Inspector Perry. Some fighting irons were found on the premises where they were apprehended. They were each fined \$10, in default of payment to suffer fourteen days imprisonment.

ATTEMPTED BURGLARY. Chan Fui, coolie, was convicted of entering the house of Chin Kuk, one of the coolies of the Blue Wu Temple, and attempting to steal a box containing clothing, worth \$5. He was sentenced to six months imprisonment with hard labour.

(Before H. E. Woodhouse, Esq.)

A GUNNER UNACQUAINTED WITH HIS MOVEMENTS.

Levi Whitfield, of the Royal Marine Artillery, H.M.S. *Iron Duke*, was charged with stealing two bundles of cigars, value 15 cents, from a hawker in Canton Bazaar on the 6th inst.

The evidence proved that the defendant had taken the cigars, but the constable who arrested him, the defendant protested, at the time he spoke to a proof that he had paid for them. The defendant this morning said he was not aware of what had occurred. An officer from the *Iron Duke* spoke to the defendant's good character during twelve years' service, and he was discharged on paying the hawker 20 cents for the cigars.

A BROWNY WATCHMAN.

Koda Box, a watchman employed by Mr. Durabie to look after some godowns on the Praya, was found asleep at his duty yesterday night. The defendant tried to prove the charge false, by asking why the constable who arrested him did not take him to the police station, as a proof that he was asleep. This defence was too absurd for the Magistrate to believe him of the impeachment, and he was fined 50 cents, in default of payment three days imprisonment.

ROBBERY AND VAGRANCY.

Li Aik, charged with robbing for three months imprisonment with hard labour, after having been convicted of being a rogue and vagabond, and watchman to gamblers on the 6th inst., near the Po Lok Theatre.

CREATING A DISTURBANCE. Fong Ah, charged with creating a disturbance in Mr. Barri's servants' quarters on the 6th inst.

Chan Pak Chi, chair coolie to Mr. Barri, said the defendant came to Mr. Barri's premises, and demanded \$1, which he was not willing to pay. Witness said he was not sure of the amount, but would pay the real sum next month. The defendant, however, became so noisy over the matter that Mrs. Barri had to suppress him. Witness said that Mrs. Barri told him that she would not be present as she did not wish the defendant punished.

A DEBACLED HOUSEBOY.

Tang Sing, servant, was charged with stealing two lamps, one ruler, four pieces of lamp wick, two table napkins, two handkerchiefs, one soap-spoon, one mustard spoon, two cigars, one napkin ring, one tin of violet powder and puff, one billiard ball and some clock forms, the property of Mr. J. G. Liddell, Superintendent of the Kowloon Docks, on the 6th inst.

The complainant said he lived on board the ship at Kowloon Dock Bay. On the 4th inst. he sent for a diamond ring, which he had left on the dressing table the previous night. The ring was not to be found, and the matter was reported to the Police, and at the same time a European sergeant in the employ of Dock Company instituted a search on board, but without finding the ring. A ruler, however, that went missing over two years ago, was found in the defendant's room. The defendant was asked where he got this article, and he asserted that he had purchased it from a Chinese boy in Hongkong. Next morning a Police constable brought all the articles on board, which the complainant recognised as his property, and spoke to having missed them on different occasions. The billiard ball was missed three years ago, the soap spoon some time ago, and formed part of a set of twelve in the complainant's possession two years ago, but which was never seen, with the exception of one or two. Nothing had gone missing within the last six months.

The defendant had been in the complainant's employ for twelve years, and had been trusted implicitly. When the articles went missing the complainant never put down the theft to the defendant, other servants having access to his room.

On the 13th inst. the defendant was found in the defendant's quarters at Hong Kong. The case was remanded until the 13th inst.

THEFT OF A DIAMOND RING.

Ng A. Ip, servant, was charged with stealing a gold ring, value \$40, the property of Tam Anung, washerman, on the 1st inst.

The complainant went on board the *Iron Duke* on the 1st inst., and while there took off his gold finger ring and exhibited it to the defendant who was a servant boy on board. After having shown it, instead of putting it on his finger again, he placed it in his purse. On the way back from the bank notes, he went to some other place, and he opened his purse to see what he had. He returned to the ship, searched everywhere but without success. On the 3rd inst. he was on board the vessel again, and the defendant then told that he had found the ring, but accidentally dropped it into the water. This complainant disbelieved and accused the defendant of having stolen it. The defendant admitted the ring, which was found on the defendant's person, and handed over the pawn ticket. The complainant did not intend to prosecute the defendant, but the latter's master having heard of the matter ordered him to be charged. The

defendant received \$10 from the amount of the Leung Yik Pawnshop in Wellington Street for the ring. When asked if it was his property by the accountant, he said he had bought it from a man to whom he had paid \$40. Inspector Perry said the accountant ought to have suspected something from the story of the defendant, and ought not to have received a ring of this description from a domestic servant without communicating with the Police. The defendant had been on board the *Iron Duke* two months, and received a good character from Commander Adams.

Sentence of four months imprisonment was imposed, and the property ordered to be given to the owner.

THE ATTACK ON A SAMPAH IN HARBOUR.

Leung Ahn, Chan Cheung, Wong Tai, Pong Ahing and Li Ahkwoon, boatmen, were charged with robbery with violence from a sampah No. 1,642, on the night of the 28th March in Victoria waters.

This case was resumed to-day, when the evidence of the complainant, who has been dismissed from Hospital, he having recovered from his wounds so far, and the Police, was heard. The story of the complainant corroborated in the main the account given by his wife. He was, however, unable to identify any of the accused, owing to defective eyesight, and perhaps owing also to the bruises on the head and face which he sustained at the time, preventing him from seeing his assailants. The evidence of the Police showed that some of the stolen articles were found in the possession of some of the defendants.

Marine Court.

(Before Captain Thomsett, R.N., Harbour Master.)

Saturday, April 8.

REFUSAL OF DUTY.

Yang Lee, boatman, and seven other seamen belonging to the British barque *St. George*, were charged by Henry Kahkko, master of the vessel, with refusal of duty on the 14th ultimo, while in Queen's Harbour.

Henry Kahkko said the defendants, with the boatman as leader, disobeyed orders and generally refused to work, and compelled him to advance one month's wages before they would begin work. They were all shipped at Swatow.

The defendants said they had no money, and were in want of some. They were discharged on condition of behaving themselves better in future, the complainant expressing himself as not wishing to press the charge.

TELEGRAMS.

Our American friends give a few particulars of the attempt on the life of the Queen, and the Bradlaugh difficulty.

THE ATTEMPT UPON THE QUEEN.

New York, March 6.—The *Tribune's* London cable letter says:—Editorial opinion to-day inclines to regard the author of the attempt upon the Queen's life as insane, but the data are still insufficient for forming a correct judgment. It is doubtful, also, whether Maclean really intended to kill the Queen. Nobody suspects that there was a political motive in the act, and there has been no hint that he had an accomplice or acted as the tool of any one. The Irish papers energetically disclaim any sympathy with homicidal attacks on the Queen. Unusual precautions were taken in London a fortnight ago to insure the Queen's safety, but they were seemingly relaxed when she arrived in London, the police at Windsor showing a rather unusual negligence. Some of the spectators urge that Maclean could easily have shot the Queen in the station, to which the access was unguarded, but it is certain that the bullet was fired, and that the Queen was really in serious peril.

All accounts are agreed that her Majesty showed courage and composure, and her demeanour since the attempt has been admirable. The Queen, herself, though undoubtedly to be always apprehensive of assassination, attaches comparatively slight importance to this outrage. She is deeply moved, nevertheless, by the world-wide demonstrations of sympathy and horror. She was also gratified by the display but even the difficulty of obtaining this, as a moderate temperature, in so warm a climate, has been surmounted by boring sufficiently deep as, by the aid of small engines, to obtain a supply of the same for the former purpose, thereby greatly facilitating the manufacture.

The news just received of a sad accident which occurred at the Anchorage on Saturday last at about ten o'clock at night, and by which it is to be feared, three lives at least were sacrificed. It appears that a Mandarin Boat with seven passengers struck on a rock somewhere in the vicinity of the Dock, and immediately sank. A

Mandarin of standing named Lee (Lee) was amongst the party, and, by the way, with two others, missing. Although the natives have been dragging the river ever since the sad occurrence, their endeavours to recover the bodies have not, up to the present, proved successful.

From the few particulars where the configuration occurred last week, the utility of Chinese fireworks is clearly demonstrated, as the fire, although of an extensive description, was kept within the boundary of these rough, though useful, structures. By the raising to the ground of this property, and partial removal of the debris, a good view is afforded of the underpart of the Long Bridge, and this we observe requires repairing very much, many of the huge columns crumbling down into the river's bed to such an extent as, we should imagine, to jeopardize the safety of even this massive building when the freshets are prevalent. Considering the enormous and continuous traffic along this bridge, and the violence of the river it has frequently to withstand, it certainly speaks well for Chinese architectural ideas some centuries ago.

The dedication of the New School building at Penang took place on Thursday last, the 23rd inst., in the presence of quite a large assembly of both foreigners and natives. Mr. Harcourt took his leave before the time when he first arrived, over thirty years ago, when the Mission only then had a small Boys' School. It was suggested that a Girls' Boarding School should be tried, and this proved such a complete success, that after a few years' operation it is now a well-established institution sufficient for the number of Scholars, and another house was built. The number of pupils still increasing, it was found necessary to erect the present building, which is capable of admitting forty girls, and already has twenty and every prospect of a steady increase.

We are given to understand that this was quite an auspicious event with the Natives, who evinced considerable interest in the proceedings. In eulogizing the system and propriety of educating their girls, one of the natives rose and said, "I am glad this building is called 'The American Girls' College' it was thought by some not right to call it a girls' school, but I think the time has come when our girls should be taught and become more our equals; they have long enough had to take the lower seat &c." The American Consul (Mr. Wingate) said he congratulated the Mission on being able to erect such a nice large building without seemingly any trouble, and certainly without having to appeal to him for help. He then congratulated Miss Newton in possessing such a healthy building in which she might carry on her work without hindrance, he wished her every success in the management of the School. He congratulated them on the friendly footing established between themselves and the Natives, the present occasion illustrating that there was one mind and one heart about the business, and it was the Christian Doctrine that had been the means of bringing them together. Mr. Woodin drew the attention of the Natives to a picture of the late President Garfield, presented to the School that morning by Wingate, and spoke of the immense amount

Manila.

(Translated from our Manila Exchanges.)

Regium Esequatur was received by the last mail, of the new British Consul here, Mr. Richardson Wilkinson, who occupied the same post in Malaga.

A shock of earthquake was felt on the 24th March, a little after 8 a.m., and its duration was about 5 seconds.

The German barque *Landung Wind*, Capt. P. F. Ohlson, with general cargo, arrived at Manila on the 27th March, 126 days from Hamburg.

The British gunboat *Darrog*, Commander F. Elliott, arrived at Manila on the 27th March, from Hongkong.

The British ship *Leading Wind*, Capt. F. M. Hinkley, in ballast, arrived at Manila on the 27th March, 46 days from Surabaya.

The British barque *Dartmouth*, Capt. B. Plinton, in ballast, arrived at Manila on the 28th March, eight days from Shanghai.

The American barque *Mary G. Reed*, Capt. G. Warren, in ballast, arrived at Manila on the 27th March, 38 days from Batavia.

The American barque *Mars Castle*, which arrived here this morning (29th March), from Batavia and Java, has been placed in quarantine, as some of her crew are down with fever of a malignant type.

The steamer *Diamante* went to-day (March 31st) to Cavite to discharge a few boilers which she brought from Hongkong.

During the second fortnight of March, there were imported into Manila \$100,779 in Spanish gold coins, but none were exported. Of silver, the importation amounted to \$52,256 in Spanish coins; of this also, no exportations have taken place. The movements of the precious metals since the month of January last to March are as follows:—Gold: imported, \$899,741; exported, \$18,000. Silver

(*Pall Mall Budget.*)

The story of his exploits in the Bulgarian campaign includes all that was most exciting in the war which brought the Russian army within sight of the minarets of Stamboul. "From the day when," to slow the stuff he was made of," he swam his horse across the Danube," the general, Dragomiroff was forcing the passage with difficulty, he restrained from reaching into Constantinople as soon as the British fleet entered the Sea of Marmora, he was the most prominent actor in the drama. He became the legendary hero of the campaign, and in the minds of the English people he almost monopolized its glories. He was always in the forefront of the hottest battle: four horses were shot under him in ten days, but he was only wounded once, and after being in constant expectation of death for months he returned home safe and sound. His white uniform was torn by his soldiers as the white plume of his hat was at the battle of Iwry. "I have heard the name," he speaks of, "of Lieutenant Greene," a general under whom they would rather fight and die than live and under another." They had often to die—sometimes 50 per cent. of his command perished; but he spared no exertion to minister to their wants and to cheer them. His division was the first to reach the front and beat down the most exposed positions in the fight, sleeping with them in the trenches and looking after all their necessities in the camp. In short, says Lieutenant Greene, "he succeeded so thoroughly in the making himself one with his soldiers that his men responded to his thoughtless as they were to obey him. I doubt if a more thorough understanding existed between a general and his men has lasted since the days of Cromwell."

His custom of wearing white, as if to court the bullets of his enemies, his reckless personal bravery, and the strange custom of his men, going into battle in his personal uniform, great undereclothing covered with perfume and scented with diamond-kilted sword, in order that, as he said, he might "die with his best clothes on," maintained him the reputation of a wild daredevil, which somewhat obscured his real aspect, as a general. In reality they only loved him because he was so brave, and he divined that the secret of power which lay in being the first in action as well as of appealing to the imagination as well as of appealing to the sense of men. When he was sent to take Geok Tepe and subdue the Tekkes many took notice of his appearance, and predicted that his apetness would be his ruin. So far from being the case, he displayed the utmost coolness in the face of the greatest deliberation; he was not until the 10th of December, when he had made all had been carried on camels to the trenches no fewer than 1,076,000 rounds of ammunition, to say nothing of several thousands of heavy guns and shells, he laid siege to Geok Tepe,

A WELL-VEG'D hog rose up in his sty and dropped a vegetable tear. "The beautiful moon has come," he said, "And a-laying will now be here."

SMALL Capitalists wishing to establish a business, should see if there is an opening for a Mineral Water Manufactory in their District. As all information and recipes for the purpose of making Lomouande, Soda Water, etc., are given, previous knowledge is not necessary. The demand for these drinks is so much on the increase, in all parts of the world, that the outlay for the machinery in all cases leads to a profitable and safe business. Catalogue forwarded free, or can be had at the office of this paper.

JANNEY & FEETES, Engineers, 23c, Forsation Street, London, N.

[28my82]

"YAA, there's money to be made in stocks, no doubt," said the old man, as he removed his hat and ran his fingers through his grey locks, "but it's a reeky business; it's like lightning, it's like lightning's going to strike, with an odd chance of hitting the tree you stand under. When you never speculate!" "Never, I dig along on the old farm, taking care crop with another, and pulling out stumps when I've nothing else to do; and if I don't make any profit at that, I haven't anything to worry about. I don't want to be a digger, and I don't want to be a speculator, and I don't want to be a speculator!" "How was that?" "Waal, I was a widower then; wife fell down the well, and was drawn out astiff as a poker. I had a big farm, lots of stock, and was about as purey solid. We all got excited about it, and we all got digging more or less holes in search of the money. I was a widder a wadder livin' about two miles me round ile in a cozen places on her farm. I was a widder with a bad nose, freckles all over her face, eyes on the squint, and built up like a camel, but when she struck me, she was a different thing. Old Deacon Spooner, who was a digger, got dashed right away. Our preacher, who was a third wife, saw the spec. I thought it over, and concluded she was an angel. I mess some six or seven of us begun counting that widder within 16 hours after the first light of day. I know the procession reached the gate to the house." "And you got out her!" "No, I didn't, and that's what I'm thankful for. Somebore or other, couldn't work up to the pink. That nose under stood in the way every time I was aye to pop the question. She acted like she wanted me, but Deacon Spooner got the nose, and they made a hitch." "And then what?" "I did nothing, except the same old thing, and I was a digger, and thus got a husband for herself, and a home for her five children. When the news came out, I was so cold along the backbone that they had to kiver me up with a hoas and a blanket, and since that time I haven't had no nerve to buy eggs at seven cents a dozen and hold 'em for a rise."—American Paper.

"Little Jack Horner sat in a corner,

thumb, or his left-hand thumb, nor one or both of them, but simply and solely his thumb—his one solitary thumb! And again we are led to enquire as to why it was that the light shone brightly by the candlestick, and entered into little cracks, as we might expect, and entered into the cracks of the night, even as Master John's Hornet. Why might it not have been a lump of tin-plate, or a piece of candied peel, or any other of the numerous ingredients to be found in Christmas pies? Alas! we know too well; sufficient it is to know that it was a thumb.

The last point we shall notice is the exclamation handed down to history as falling from the lips of our dear departed friend of whom it may be said in the words of the Apostles—or Shakespeare, I forget which, but it is immaterial—"We shall never see his like again!" But though gone from us, my dear brethren, he still speaks to us in the words of his beautiful and expressive words of our text, and from which we have derived strength and encouragement—"What good say am I!" We know how inadequate are our feeble powers to deal properly with these sublime words. We can only say that we hope they will remove any doubts that may be lingering in the minds of our hearers as to how the said pie came into Master John's hands, and as to his motive in coming into the corner to eat the pie. Here we have his own words—and what more do we require!—as a justification for what he has done. Note the confidence with which he is able to review his actions, and how cheerfully he sums them up in one grand sentence—"What a good boy am I!" Some of our mistaken critics may say there was a lack of modesty in the statement, others might even insinuate that the pie was not performed on the brass instrument, known as the trumpet, on Master John's behalf, but we can't look in the prime of life; but we can look deeper into the matter than
